Education

University of Maryland *BS, Computer Science* *BS, Math (Statistics)* Aug 2024–May 2027

- President's Scholarship (\$12,500/year)
- Coursework: Spatial Data Science, Introduction to {Machine Learning, Quantum Computing, Data Science}

Work Experience

Google Sunnyvale, CA
Software Engineering Intern May 2026–Aug 2026

- Improved auto-rater performance on Workspace generative AI features through advanced prompt engineering using the Apache Beam Python SDK, Protocol Buffers, and Bazel

Anxin Management Boston, MA
Intern June 2025–Aug 2025

- Doubled manager bandwidth and reduced expected response time by 10 minutes by designing and writing an AI chatbot using Python, LiteLLM, and Google Gemini
- Reduced document retrieval time by two minutes by integrating the chatbot with the property management system using Swagger Codegen

Hiworld Shenzhen, China
Intern July 2024–Jan 2025

- Reduced labor requirement of a common image understanding workflow by 25% by creating an AI-powered Python application
- Deployed and documented the customer support phpBB forums in a cloud server on LAMP and Postfix

Projects

Quantum Algorithm for the Kidney Exchange Problem *Bitcamp Quantum Winner* Apr 2025

- Implemented a quantum algorithm using PennyLane
- Converted kidney transplant compatibility datasets to DOcplex integer programs using Python
- Verified quantum solutions using the PuLP optimization library
- Visualized quantum algorithm effectiveness by plotting results using Matplotlib

Gunn High School Alumni Directory Website Feb 2023–June 2023

- Deployed, secured, and managed a Supabase backend containing a PostgreSQL database
- Tracked project milestones using GitHub projects
- Designed and wrote a school email verification system using Next.js, Nodemailer, Nhost, and GraphQL
- Wrote an authentication backend using Fastify and SQLite

Virtual Character Live-Streaming Web App *GunnHacks 9.0 2nd Place* Jan 2023

- Allowed website visitors to live-stream on popular platforms as VTubers without installing software by developing a Next.js web app
- Integrated webcam-tracked virtual characters using Kalidokit
- Manipulated live video and audio streams using MediaPipe Holistic, Three.js, and the MediaStream API

Skills

Programming Languages: C++, TypeScript, Python, Java, SQL, SAS, C, Shell Scripting, JavaScript, HTML
Libraries: OpenAI Platform, React, PyTorch, Pandas, NumPy, Scikit-Learn, Matplotlib, SciPy, Node.js
Frameworks and Tools: Pytest, JUnit, Next.js, Flask, Git, Linux, Jupyter, Vagrant, Docker, Google Cloud (GCP)
Certificates: CodinGame C++, CodinGame Coding Speed, CodinGame Collaboration
